

RAJESWARI POKALA

rajeswaripokala16@gmail.com

+91 9390745228

<https://port-folio-rajeswari-pokala-io9v.vercel.app>

Enthusiastic front-end developer and third-year B.Tech student with strong skills in HTML5, CSS3, JavaScript (ES6+), React, Python, OpenCV, and modern UI/UX design. Experienced in building responsive web applications, computer vision projects, and contributing to marketing/social-sector initiatives. Adept at problem-solving, API integration, and learning new technologies to deliver clean, maintainable code. Actively participated in AI hackathons and completed 160+ days of competitive programming.

Experience

Marketing Intern, Mindeniuos

Dec 2024-Jan 2025

- Assisted the marketing team in planning and executing digital and offline campaigns, applying marketing strategies learned during the internship.
- Researched and analyzed customer needs to support targeted promotional content and improve audience engagement.
- Collaborated with team members to coordinate tasks and ensure timely delivery of campaign activities.

Social Sector Intern, Pawzz

Jan 2025- Mar 2025

- Supported community-focused initiatives, contributing to outreach activities and awareness efforts run by the organization.
- Worked closely with staff and volunteers to execute assigned responsibilities with diligence and consistency.
- Developed transferable skills in teamwork, communication, and empathy while working in a mission-driven environment.

Education

High School

2021

GPA:10.0

Intermediate

2023

GPA:8.44

Annamacharya Institute of Technology & Sciences

2027

GPA:8.56

- Bachelor of Science, Development & Frontend Technologies
- Currently in 3rd Year
- Focus Areas: Full-Stack Web Development, AI/ML, Computer Vision

Skills

Technical:

- HTML5, CSS3
- JavaScript, ES6+
- Responsive Web Design
- Data Structures & Algorithms
- Prompt Engineering
- SQL, MySQL, DBMS
- Front-End Development
- React (basic), Front-End Frameworks
- Version Control, Git, GitHub
- UI/UX, User Interface, User Experience

Tools & Soft Skills:

- VS Code, PyAutoGUI
- NumPy, SPSS Statistics
- Problem-Solving
- Creativity and Innovation
- Time Management
- Attention to Detail / Eye for Detail
- Communication Skills
- Collaboration & Teamwork
- Adaptability, Willingness to Learn New Technologies

Projects

3D Hand Gesture Controller | JavaScript, Three.js, Media Pipe

2025

- Built a browser-based demo that lets users control a 3D model using real-time webcam hand gestures.
- Integrated Media Pipe hand tracking with Three.js to map key points to 3D transformations and smooth animations.
- Improved understanding of computer vision pipelines and interactive 3D UX for the web.

AI Virtual Mouse using Hand Gestures | Python, OpenCV, Media Pipe, PyAutoGUI

2025

- Developed a computer-vision-based virtual mouse that enables touchless cursor control, clicking, and scrolling using real-time hand gestures captured via webcam.
- Implemented hand-landmark detection with Media Pipe and mapped gestures to system mouse events using OpenCV for video processing and PyAutoGUI for OS-level interactions.

Invisible Cloak – OpenCV Project

2025

- Built a fun computer-vision project that makes a selected colored cloth (cloak) appear invisible on camera in real time.
- Captures the background first, then uses color detection and masking to replace the cloak area with the stored background so only the person is hidden, not the surroundings.

Mini Web Applications – Personal Projects | HTML, CSS, JavaScript

2025

- Built multiple small applications including a basic calculator, dress amount/price calculator, and a weather lookup tool that fetches real-time data from a public API.
- Strengthened fundamentals in DOM manipulation, event handling, form validation, and API integration while practicing clean, readable front-end code

Certifications

- Introduction to Java – Solo Learn (Online Course, Programming Fundamentals), 2024
- Introduction Artificial Intelligence - Infosys Springboard(Artificial Intelligence),2025
- Introduction to Cloud - Cognitive Class(Cloud Computing),2023
- Machine Learning with Python – Cognitive Class (Machine Learning, AI,Python),2025
- GfG 160 – 160 Days of Problem Solving (with Summer Workshops) – GeeksforGeeks, 22-week competitive programming & DSA course, 2024
- Professional Certificate: IBM SPSS Statistics Expert – Udemy (MTF Institute of Management, Technology and Finance), 2025
- Introduction to Data Science – Cisco Networking Academy, 2025
- Recursion (DSA Course) – Code Chef, completed all lessons and projects, 2025

Hackathons & Technical Competitions

AiroThon 2025 – Agentic AI Hackathon

- Participant, Team Codecrafters, Airo Digital Labs, 2025
- Developed an AI-focused prototype in a 24-hour hackathon, collaborating with teammates on problem definition, model integration, and front-end implementation.

Agentic AI Hackathon

- Certificate of Participation - Google Cloud / TCS, contributed an innovative Agentic AI idea to address real-world problems, 2025

HackShastra - Hackathon

- Participant, Team ATS CODERS, Annamacharya Institute of Technology & Sciences, 2025

Generative AI Mastery Workshop - GenAI Buildthon

- OpenAI Academy / NxtWave, Certificate of Appreciation for completing India's Biggest GenAI Buildathon workshop, 2025

Achievements

- Completed 30 Days of Code challenge, maintaining daily coding streak and strengthening core programming concepts.
- Earned proficiency badges in C, C++, Java, and Python on HackerRank for solving multiple language-specific problems.
